Optional

No glue

Drill hole

Bend

WARNING:

Contains small parts which may be hazardous to children under 14 years of age.

1a

M8 Scott 75mm Howitzer

Designer Notes:

After attaching the howitzer (B05) to the turret, you might find the gun, besides able to move up and down, can also sway a little bit sideways. This is normal... as the real howitzer can also do so in combat situations.

1b

M5A1 Stuart (Mid Production) 37mm M6 Gun

OPTION: Cut B09 in halves to allow the hatches to be glued in open or close position.

* Optional

OPTION: The Crew Hatches B24 & B26 can be glued in open or close position.

5a

M8 Scott

Modelling Tips / Designer Notes:

This **M8 Scott** is modelled as a mid production armoured vehicle, but if you have purchased our **M5A1 Stuart** (280023), you can upgrade this M8 Scott to become a late production model. The parts are designed to be fully compatible with each other.

If you own both kits, you can experiment with different configurations based on your modelling or gaming needs.
