

1

IMPORTANT: Read This FIRST!

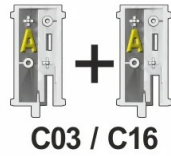

On the underside of part C03/C16 and C07/C15 an embossed letter "A" and "B" is engraved respectively. Assembling pieces with the same letter (that is A/A or B/B) will allow you to build a straight wall section. Assembling pieces with two different letters (that is A/B) will allow you to build a corner wall section.

It is best to **test-fit** the two pieces before gluing the two parts together to form either a straight or corner wall.

Choices & More Choices...

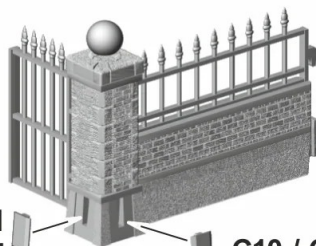

Based on your own requirement, using the pillar as the center piece, you can connect wall or gate pieces to it.
